

Proctor-Pittsford Country Club Went **Solar**

You Can Too!

PPCC invested in a solar array that will pay for itself in 5-6 years, but produce power for more than 30! It will offset more than **600 TONS** of carbon.

As a member of PPCC, pay a special, dramatically reduced rate! For a limited time*, Same Sun is offering club members an economy-of-scale price similar to what the club's array cost. During this promotion, an average home array will cost about \$2,000 less than current market pricing. Plus, contracts signed during June 2018 are eligible for existing net metering rules, which are more beneficial to you.
